## Football 2020 season covid names

No sport or league was spared from the chaos of 2020, but the size, scale, number of teams and exuberant nature of college football made playing in the era of COVID-19 a mess. The Big Ten, Southeastern Conference and Pac-12 chose conference-only play in July and in August, confusion and uncertainty prevailed. MAC and Mountain West postponed their seasons, closely followed by the Big Ten and Pac-12. After weeks of back-and-forth, the vast majority of major conferences and teams had agreed to play at least some games, and the season progressed clumsily toward a very uncertain postseason. The issue of attendance has been an inconsistent hodge-podge from the beginning. Some teams play in front of fans to a certain percentage of normal capacity. Others play to empty stands where local rules prohibit live attendance. Others play all their games in shuttered facilities whether the state allows fans or not. One thing is certain though - many schools are going to lose a lot of money. To get an idea of what each college football team stands to lose from the chaotic 2020 season, GOBankingRates used the U.S. Department of Education's Equity in Athletics Data Analysis from 2017, 2018 and 2019 to learn about each team's average revenue and profits. These figures were used as markers for potential revenues and profits that could be lost this year. This list includes the 30 colleges that bring in the highest average football revenue and profits - ranked from lowest to highest average profit - so you can have a look at what this season might cost them. Look how much these schools stand to lose. GOBankingRates first found (1) 2019 total football revenue; (2) total football expenditure for 2019 (3) 2019 surplus from football program; (4) total football revenues for 2018; (5) total football expenditure for 2018 (6) 2018 surplus from football program; (7) Total football revenues for 2017 (8) total football expenditure for 2017 and (9) 2017 profits from football program for each institution. In order to calculate potential losses for this in the 10th season, GOBankingRates (10) found three-year average total football revenue; (11) average three-year total football expenditure and (12) three-year average football programme profits for each institution. To qualify, each institution would have to have an NCAA Division 1 FBS football program for the 2020 season. All data was collected on 9 September 2015. About the author No sport or league was spared from the chaos of 2020, but the size, scale, number of teams and exuberant nature of college football made playing in the era of COVID-19 a mess. The Big Ten, Southeastern Conference and Pac-12 chose conference-only play in July and in August, confusion and uncertainty prevailed. MAC and Mountain West postponed their seasons, closely followed by the Big Ten and Pac-12.
